Basic Ration Management.

PRECISELY.

With Digi-Star's EZ 3400VL indicator you can...

- Build different recipes for multiple pens
- Utilize basic recipe and batching capabilities
- Eliminates the need for feed sheets
- Enter rations by three different methods
 - Amount per animal
 - Percent per load
 - Amount per load
- Move the cursor logically through setup screens and menus
- Simply edit existing recipes or add new recipes/rations
- Toggling capability allows user to change modes (Net/Gross/Load/Unload)
- Access a definable Ingredient Name Table
- User can choose from 1 ingredient with 98 pens to 98 ingredients for 1 pen, with any combination in between
- First Ingredient Resizing - allows bales of different weight to be loaded as 1st ingredient and adjusts all other ingredients to compensate for a target final weight

If your goal is to utilize advanced feed management software, please check out Digi-Star's EZ 3600 and other advanced indicators.
