

**Track forage
from field
to bunk.**

PRECISELY.

FORAGE TRACKER™

EASY | ACCURATE | DOCUMENTATION

Forage Tracker™ 

DIGI★STAR

PRECISELY

Precision automated management system specifically designed for forage harvest.

Model GT 460

Forage Tracker works with the multi-purpose GT 460 providing superior capabilities to track your harvest from 1st cutting haylage through late-season corn.

AutoLog₂

AutoLog₂[™] convenient Automatic Start/Stop Function (patent pending)

Record customization option

Keyboard for easily editing or changing field information

Track weight by field

Unique data transfer to a USB

Time-Saving Benefits

- Calculate tons/acre using weight data
- Electronic records eliminate guesswork
- Save time by weighing in the field vs hauling to a platform scale
- Helps you make informed decisions to manage forage harvest for best performance and profitability
- Enhance custom harvest statements
- Know how much feed is in the bunk

Unique Digi-Star Features

- Document each and every load
- Calibrate forage harvester yield monitors
- ID button allows for record customization, including multiple forage harvesters

AutoLog₂

Automatic Start/Stop Function (Patent Pending)

No need to remember to push the Start/Stop button when unloading, it's done automatically.

Preset maximum weight limits to avoid overloading trucks or axles.

Forage Tracker software works with the GT 460 weighing system on forage wagons and trucks.
