Reduce your cab clutter. PRECISELY.

Serial | CAN | ISOBUS

SCALE LINK™

Use existing virtual terminal (VT) as scale indicator interface display.
Use with a variety of implements.

Scale Link Systems
Designed to gather weight information using our unique algorithms to provide accurate output in serial, CAN, or ISOBUS format.

Scale Link can be used in applications such as grain carts, planters, seed tenders, air seeders, TMR’s, manure and fertilizer spreaders, where communication of weight values are used independently or in conjunction with other systems.

Remote Display Option
- View scale information on your implement
- Use with or without VT in cab
- Add to all systems at any time
- Variety of mounting options available

Scale Link Virtual Terminal Display
- User interface possible with existing hardware
- Connectivity to all major brands of VTs
- Allow implement manufacturers to utilize weight information in their system programming

Scale Link ISOBUS Communication
ISOBUS is interconnectivity between different manufacturers.
- Manufacturer spanning inter-operability between implement and tractor
- Use of a common VT for all implements

Scale Link ECU
- Weatherproof to ensure years of reliability
- Contains scale electronics and connections
- Easy mounting and connection options
- Scale information transmitted using Serial, CAN or ISOBUS format
- EZMate™ or Terminal block versions available

Scale Link communicates and adapts for use with all major brands of virtual terminal displays.
